The ICAST has become a tradition in recent years in the Greater Chicago Area. This annual international conference provides a technical forum for scientists, researchers, industrial practitioners as well as policy makers to exchange ideas, share research findings with the aim to promote cross-field interactions and collaborations among academic and industrial participants. The main theme for ICAST 2007 is "Imagination, Innovation and Integration of Advanced Sciences". The expanded program has 4 tracks. The tracks and related topics include (but are not limited to):

#### Emerging Biomedical Technology

- Genomics and Proteomics
- Strategic Drug Discovery
- Live Cell Imaging
- Stem Cell Therapy

#### Innovative Food Technology

- Food Emulsions and Foams
- Stabilizers & Their Applications in Food
- Food Safety and Regulatory Issues
- Sport Beverages
- Product Development in US Food Industry

#### Advanced Industrial Technology

- Nuclear and Alternative Energy Technologies
- Industrial Process Control Technologies

#### Integral Environmental Issues

- Global Warming
- Recycling Process
- Waste Treatment
- Emission Control
- Green Technology

### Format of the Meeting

The conference language is English, and the scientific section of the meeting will include two parallel sessions that address the four main topics outlined above. Each session will consist of 3 to 5 seminars presented by selected/invited speakers. Those interested in conducting a seminar in the forthcoming gathering are requested to submit an English abstract of 200-400 words. Each submission must include the title, the author's name, affiliations, email/ mailing address, and telephone numbers. Please make your submission in electronic form via email as embedded plain text or as an attached MS Word file to either of the Technical Program Chairs at the following addresses no later than Aug. 31, 2007. Selected speakers will be notified by September 30, 2007.

Please submit your electronic abstract to Technical Program Chairs:
